IÑIGO YANGUAS ELORZ

ARCHITECTURE. URBANISM

I am a professionally restless person who is always willing to give the best of himself, which is why I have been an Intern Student in the Department of Theory, Projects and Urbanism for four consecutive years throughout my academic studies. In teamwork I am a good mediator, listening and making consensual decisions. My passion for experiencing different cultures, people and languages has allowed me to gain initiative and to travel to many countries both accompanied and autonomously.
